

## The Limits of Environmental Governance

**Award Year:**

2012

**Principal Investigator:**

Arun Agrawal, University of Michigan

Kerry Waylen, The James Hutton Institute

**Associated Program:**

[Foundations](#) <sup>[1]</sup>

Bringing together colleagues from both academia and the world of practice, participants in this synthesis project will develop a more acute and systematic understanding of the promise and limits of environmental governance in relation to the long term sustainability of social-ecological/human-environmental systems. Their primary focus will be on how disciplinary and interdisciplinary knowledge (from the social as well as ecological sciences, in addition to the fields of political ecology, common property, and feminist environmentalism) can inform those interested in averting local and non-local social-ecological collapse.

**Participants:**

Arun Agrawal, University of Michigan

Meriem Bouamrane, United Nations Organization for Education, Science and Culture (UNESCO)

Kathleen Buckingham, Oxford University

Rosie Cooney, University of New South Wales

Beatrice Crona, Stockholm Resilience Centre

Maria Fernandez-Gimenez, Colorado State University

Louise Glew, World Wildlife Fund

Donald Nelson, University of Georgia

Peter Newton, University of Michigan

Julio Postigo, SESYNC
