

Programs

Opportunities to learn about and practice socio-environmental (S-E) synthesis are critical for building capacity for S-E synthesis research and for developing understanding of this problem-solving approach and its associated concepts and competencies. Currently, the National Socio-Environmental Synthesis Center (SESYNC) offers several training and learning opportunities including:

- Postdoctoral Fellowship Programs;
- Graduate Research Program;
- Short Courses, such as Teaching Socio-Environmental Synthesis with the Case Study Approach.
